CIUTADELLA ROUNDED LIGHT

James Beard's 1972 reference, *American Cookery*, describes three red velvet cakes varying in the amounts of shortening and butter, also vegetable oil. All used red food coloring, but the reaction of acidic vinegar and buttermilk tends to better reveal the red anthocyanin in cocoa and keeps the cake moist, light and fluffy. This natural tinting may have been the source for the name red velvet.

CIUTADELLA ROUNDED SEMIBOLD

ESA HORIZON 2000

CIUTADELLA ROUNDED LIGHT

The cardigan was named after James Brudenell, 7th Earl of Cardigan, a British Army Major General who led the Charge of the Light Brigade at the Battle of Balaclava during the Crimean War. It is modelled after the knitted wool waistcoat that British officers supposedly wore during the war. The legend of the event and the fame that Brudenell achieved after the war led to the rise of the garment's popularity. The term originally referred only to a knitted sleeveless vest, but expanded to other types of garment over time. Plain cardigans are often worn over shirts and inside suit jackets as a less formal version of the waistcoat or vest that restrains the necktie when the jacket has been removed. Its versatility means it can be worn in casual or formal settings and in any season, but it is most popular during cool weather. Monochromatic cardigans, in sleeved or vest form, may be viewed as a conservative fashion staple. However, due to youth clothing ideology, striped cardigans sporting vivid colors are also seen on skateboarders. As an item of formal clothing for any gender, it is worn over a button-down dress shirt. A less formal style is a T-shirt underneath.
