A currency in the most specific sense is money in any form when in use or circulation as a medium of exchange, especially circulating banknotes and coins. A more general definition is that a currency is a system of money in common use, especially for people in a nation or country.

New classical macroeconomics further challenged the Keynesian school. A central development in new classical thought came when Robert Lucas introduced rational expectations to macroeconomics. Prior to Lucas, economists had generally used adaptive expectations where agents were assumed to look at the recent past to make expectations about the future. Under rational expectations, agents are assumed to be more sophisticated. A consumer will not simply assume the past few years directly because of a inflation rate.

About the font 9 pt

Geogrotesque Sharp is a superfamily of seven widths and 99 styles that puts together the work of a decade. Some design aspects has been simplified but without losing its soul, we have removed ink traps and rounded corners. This update lead Geogrotesque to another dimension, becoming more usable and less idiosyncratic. A Variable Font version is included with the family or as a separate style. Despite being more web oriented, this new format has gained popularity in recent years, so we thought it was the right moment to launch a variable Geogrotesque.

Languages 9 pt

Geogrotesque Sharp support at least the following languages: Afrikaans, Albanian, Basque, Bosnian, Bulgarian, Catalan, Croatian, Czech, Danish, Dutch, English, Esperanto, Estonian, Filipino, Finnish, French, Galician, German, Hungarian, Icelandic, Indonesian, Irish, Italian, Javanese, Kurdish, Latin, Latvian, Lithuanian, Malay, Maltese, Moldovan, Norwegian, Polish, Portuguese, Romanian, Scottish Gaelic, Serbian, Slovak, Slovenian, Somali, Spanish, Suahili, Swedish, Tagalog, Turkish, Welsh, Zulu.
