Readability is the ease with which a reader can understand a written text. It depends on its content and its presentation.

Social media are computer media technologies that facilitate the creation and sharing of information, ideas, career interests and other forms of expression via virtual communities and networks. The variety of stand alone and built in social media services currently available introduces challenges of definition; however, there are some common features. Users typically access social media services via web based technologies on desktop computers, and laptops, or download services that offer social media.

About the font

Isotonic started out as a spin-off with the idea of creating a text oriented version of Ciudadella, it has since taken on a life of its own. Building on a foundation that has proven to work very well, we decided to open the counters and increase the x height. Even though it is not strictly a text font, it works surprisingly well in body sizes and screens. The soft corners gives charm, closeness and an appropriate voice for sports, science, tech, economy etc.
