Social media are computer mediated technologies that facilitate the creation and sharing of information, ideas, career interests and other forms of expression via virtual communities and networks. The variety of stand alone and built in social media services currently available introduces challenges of definition; however, there are some common features. *Users typically access social media services via web based technologies on desktop computers, and laptops, or download services that offer social media functionality to their mobile devices.* When engaging with these services, users can create highly interactive platforms.
